Universidad de Oviedo

Oviedo July 31st, 2017

Dear Ing. Armando Zambrano, Presidente del Consiglio Nazionale degli Ingegneri,

I am writing to you to invite Ing. Ania López, Consigliere of the Consiglio Nazionale degli Ingegneri di Roma, as a visiting speaker for the 3rd International Conference-Workshop- MoMoWo *Women Designers, Architects and Civil Engineers between 1969-1989*, 2nd to 4th of October 2017, that will be celebrated in the Historical Building of the University of Oviedo in Asturias (Spain).

Women's creativity since the Modern Movement (MoMoWo) is a large-scale cooperation project co-funded by the Creative Europe Programme within the Culture sub-programme. MoMoWo is an interdisciplinary non-profit project that contributes to create European added value, as expected by Creative Europe.

I have communicated with Ing. Ania López by email and she facilitated me the title of her intervention: *Ingenio al Femminile*, a very important project she is working from 2013 and it is a very interesting contribution to our MoMoWo International Conference.

We are delighted to count on the presence of Ing. Ania, as an invited Speaker.

Sincerely,

Ana Mª Fernández García
